## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-47 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicants teach a network-based voice command platform for interacting with remote users via speech signals exchanged between the user and the voice command platform via a telephone and a communications network, comprising a user communication interface for receiving speech from the user via the telephone and the network, a processor, an application processing module executable by the processor to process voice command applications designed for interacting with users via speech, the voice command applications defining user prompts, allowed grammars and application logic, a voice processing module executable by the processor to recognize the allowed grammars in speech signals received from a user via the user communication interface, and to convert the user-prompts into speech signals for transmission to the user via the user communication interface, the voice-processing module having a plurality of selectable modes of operation, and, selection-logic executable by the processor in response to a specification received during a voice command session with the user, to cause the voice-processing module to operate according to a mode of operation that corresponds with the specification. The cited prior art alone or in combination fails to fairly suggest or teach the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
